

EasyPetFence.com

I am contacting you from EasyPetFence.com to share information about our DIY cat fence system, the Kitty Corral, and to offer a discount code to new cat adopters that may wish to fence in their properties.

Our Kitty Corral cat enclosures are made from the same quality poly fence mesh material as our puppy fence. Kitty Corrals for kittens and adult cats are offered in multiple heights from 6' and 7.5' feet high - much taller than traditional fences and combine an unsteady feel and impassable overhang to make pet cats apprehensive and unable to climb the cat fence. With overhang extenders, cats are forced to stay in, while keeping wildlife, birds, stray dogs and feral cats, out. The base of the cat fence is constructed from welded wire fence mesh to prevent chewing and escaping.

Like dogs, cats need outdoor exercise, entertainment and socialization with other animals. EasyPetFence.com would like to offer a 10% discount code on our cat fence kits to new cat adopters. The discount code is "Easy123" and can be used exclusively on EasyPetFence.com.

Please consider announcing this offer from EasyPetFence.com under your Knowledge base; and let me know if you have any questions about our DIY cat fence system.

Thank you,

Jennifer Smith
